```
E              G#m          B
  I wake up in the afternoon
      F#                    E
Empty walls make up the room
        G#m               B
And I m wishing for one thing
   F#                  E
To give myself the strength
            G#m
to keep myself alive
B                 F#
Long enough to make
                E
sure you don t try
          G#m               B
To turn out anything like me

Another fraud, another fake
```

not the one who s wrong

You re keeping me sane
                          G#m
when I m feeling alone
              E
I wield my heart
                    G#m
and my flesh and bones
Don t leave me to
E                 Ebm E
die by myself I   can t
F#
live without you

Verse 2:
E               G#m
  Someone is creeping
              B
through the blinds
        F#
Calling me from
          E
these confines
               G#m
there s only so
            B
many more days
   F#                  E
Until you re cast away
          G#m
From ever seeing me
B                   F#
They won t understand
                E
they ll never see
             G#m
The way you medicate my
B                   F#
head Without you here

You re all I have

In a place that hates

I can t live without you
G#m(hold)
