

Melatonin

Silversun Pickups

This is how I play it acoustically. The chord progression is really pretty just by itself.

Chords used:

G: 320033

Em7: 022033

Dsus4: x00233

D: x00232

Cadd9: x32033

A7sus4: x02233

Here is the chord progression. It runs constantly through the song. Play each chord for measures, except for Dsus4 and D, which are played for one measure each.

G Em7 Cadd9 Dsus4 D
A7sus4 Cadd9 Dsus4 D

She ran into the wall
So sweet and unknown
A worn comatose

After six milligrams
We re talking again
Who would know?
So sweet and so low
Who would know?

My brain doesn t produce any
I m soaring without anything

She said I m taking my time
And now we ll move on with everyone
I ll see my friend soon again

My brain doesn t produce any
I m soaring without anything

And we said aloud
And we can t pull out
