Song: Say Goodbye
Artist: Skillet
Album: Comatose

Tuning: Standard

Well, first things first, I can't take full credit for this tab, it's really just other tabs I've edited. Credit to Fade-2-Black994 on the chords and rokno on the solo. Also, the bridge, I've put down power chords, mostly because it sounds better... but the B5 actually a B5, it's a variation (or something like that) on that chord, but I didn't what to call it so I put B5. If you like this tab, check out my tab for Monster (ver3 I Anyways, enjoy =]
