

**My Oh My
Slade**

A beautiful song with a great melody and tons of emotion. And not a chorus in site...

The instrumental break is NOT same chord progression as the verse. For some reason, there is a key change just for this break which is a perfect 6th higher than the verse chords, making them

A Dmaj7 A Dmaj9 A etc.

and then it goes back to the original key for the rest of the verses. Possibly to give the illusion of a key change for the big finish. Who knows? It s just as easy to play the same chord progression as the verses, for the break, unless you want to be absolutely authentic.
