

Over You  
Smokie

A E F#m A E F#m

It was a cold night  
January light by a silver moon  
And the band played  
another serenade to lovers tune  
But your crying eyes never could disguise  
What was on your mind  
And through it all I never would have called  
You the hurting kind  
Then you closed your eyes said goodbye  
And turned and walked away

(Chorus):

Baby don't you know it's true  
There's nothing more that I can do  
Even though I know we've through  
I just can't get over you

Like the last time you said that you were  
Mine and you'll never go  
Those were good days thought you'll figured  
Out a way I would never know  
I was crazy to let myself believe I was the only one  
I was so blind should have seen the sign of all the
