Social Distortion - Cold Feelings
Bbm Gb Db
[Verse 1]
                          Gb
                                       Db
Uninvited feelings, they come without warning and they stay too long
                             Gb
                                        Db
I don t wanna feel, and if I run they ll be just as strong
Bbm
                          Gb
                                      Db
I ve been a-waiting, I m waiting for some kind of sign
                          Gb
I try to separate, try to separate my body from my mind
[Verse 2]
Bbm
                          Gb
                                       Db
I watch the clock as the second hand slowly goes strolling by
                              Gb
I don t want to feel, when a loved one s time s come to die
                          Gb
                                      Db
I ve been a-waiting, I m waiting for some kind of sign
Bbm
I try to separate, try to separate my body from my mind
[Chorus]
Bbm Gb
Cold feelings in the night
   Bbm
               Gb
You know, this feeling just ain t right
             Gb
And though I try I just can t hide
Bbm Gb
Cold feelings in the night
Look out!
[Verse 3]
Bbm
                       Gb
                                 \mathbf{D}\mathbf{b}
Yeah I got faith, but sometimes fear it just weighs too much
                            Gb
I don t want to feel, cold winds blowing through me like an empty touch
                          Gb
                                     \mathbf{D}\mathbf{b}
I ve been a-waiting, I m waiting for some kind of sign
```
