

The Microwave Song
SoftLightes

SoftLightes - The Microwave Song

First, listen the whole song and then make the rhythm with the guitar.

Chords: **G D Am**

I m just a light boy
Looking for a lighter day
And it s a cold wet Wednesday
We had days in the sun
But they added up to none
It s just the fate of the atomic age

There were lights in my head
But they lost their place
I m not good enough for Saturdays
We had days in the sun
But they added up to none
It s just the fate of the atomic age

I am just a microwave (x6)

I think I ve heard these words before
They made me blue
I m looking at you from your tennis shoe
But I m stuck to the sound
Of your merry-go-round
You re just a beautiful kind of blue

I am just a microwave (x6)

And there s a lot of us (x3)
And there s a lot of us, of us, of us

I am just a microwave (x12)
