

**I Want To Save You**  
**Something Corporate**

After not being able to find chords to this song ANYwhere online (since its a live acoustic version) I decided to plunk something out that sounds close enough to the way SoCo plays it. This is a really fun song to play and sing. Especially for MOAO.

Ok, so what I ve done is labelled the chords for the first verse and the chorus. The rest of the acoustic version of the song just follows the same pattern. You can throw in some hammers and pull-offs on the b string with your middle finger if you want, but its not necessary for this to sound great. Sounds best with barre chords, 8 beats to a measure (123 123 12). Make sure to change quickly between chords to get that SoCo sound.
