There are far too few tabs for this great band. ive only been playing a year and a half,
but i thought id try and do this band some justice.
- only found bass tabs for this song so far, so here s my 1st attempt at the guitar part.
i ll try and update it when i can. email me any corrections/improvements.

Not too sure about how to do the timings either, but listen to the song, it should be fairly easy to work out.
