

**Movie Monster
Sound Team**

This is a tab of the song by Sound Team, the band which split around 2006. However, I think this shouldn't go unnoticed. The whole song is really simple and has only three chords in it as far as I've figured out. In the song, chords are played on keyboard or synthesizer but can be done on guitar as well.

Intro: **C**

Verse:

C

Something tells me, something tells me

Em

That it's just beginning.

C

Someone told me, someone told me

Em

Another name you'd given

C

D

Somewhere that you tried to leave,

Em

But it wasn't working.

C

D

It was just one of those awkward times

Em

When you run into someone after you've said all your good-byes.

Small Break: **C, Em, C, Em.**

Something tells me there's no hurry;

We should all just keep on walking.

They had us going for a while there,

But now it isn't working.

They didn't want the world to know the movie monster was mechanical.

The blasting music clears my head and I forget the things you said to me.

We put our hands into the air,

But we don't need to be delivered.

The old ways are gone but we don't care;

We're still connected by gesture.

Everyone already knows the monster was mechanical;

Just one of those awkward times,

You shrug 'cause you guess so,

Something you already know.

Break: During the break, the same chords are played just much louder.

C, Em, C, Em, C/D, Em, C/D, Em.

When did that feather in your cap turn into a black eye, my friend?
I m gonna be there when you go down.
Diamonds turn back into coals whenever they die.
We ll run into less and less old friends.

The devil s always boring me
About the angel that he used to be.
He d do anything.
I m gonna be there when you re going down,
Be there when you re going down

They didn t want the world to know the movie monster was mechanical.
The music blasting clears my head and I forget the things you said to me,
Something you already know,
Something you would always say to me.

Finish on C.
