

Changes

St Peters Crispian

**F**                    **G**  
Sit by my side  
                  **C**                    **Am**  
Come as close as the air  
**F**                    **G**                    **Em**  
Share in a memory of gray  
                  **Am**                    **F**  
And wander in my words  
**G**                    **C**  
Dream about the pictures  
                  **Am - F - G C**  
That I paint of changes

**F**                    **G**  
Green leaves of summer  
**C**                    **Am**  
Turn red in the fall  
**F**                    **G**  
To brown and to yellow  
**Em**  
They fade  
**Am**                    **F**  
And then they have to die  
**G**                    **C**  
Trapped within the circle time  
**Am-F-G**            **C**  
Parade of changes

**F**                    **G**  
Scenes of my young years  
                  **C**                    **Am**  
Are warm in my mind  
**F**                    **G**                    **Em**  
Visions of shadows that shine  
**Am**                    **F**  
Till one day I returned  
**G**                    **C**  
And found they were the victims  
                  **Am-F-G**            **C**  
Of the vines of changes

**F**                    **G**  
The world s spinning madly  
**C**                    **Am**  
It drifts in the dark  
**F**                    **G**                    **Em**  
Swings through a hollow of haze

**Am**                      **F**  
A race around the stars  
(A race around the stars)  
**G**                              **C**                      **Am-F-G**  
A journey through the universe ablaze  
(A journey through the universe ablaze)  
**C**  
With changes

**F**                              **G**  
Your tears will be trembling  
**C**                              **Am**  
Now we re somewhere else  
**F**                              **G**                              **Em**  
One last cup of wine, we will pour  
**Am**                              **F**  
And I ll kiss you one more time  
**G**                              **C**  
And leave you on the rolling  
**Am-F-G**      **C**  
River shores of changes

**Am**                              **F**  
I ll kiss you one more time  
(I ll kiss you one more time)  
**G**                              **C**                              **Am-F-G**  
And leave you on the rolling river shores  
(And leave you on the rolling river shores)  
**C**  
Of changes
