Shape Up
State Champs

[Verse 1]
```
        E
When I tell the story of this decade
    C#m                        B
The memories and melodies are never the same
E
I knew that we prevailed
        C#m                    B
Knew it all too well, never end up stale
E
Another thing that I wish I knew
    C#m                          B
Is how you re gonna sit me down and make me choose
E                          A
There s no doubt it will turn around
```

[Chorus]
```
          C#m  B              A      C#m
So I ll tell myself that I m not a victim
E                    B                   A
But I ll own up to the mistakes that I made
      C#m              E
I can see through it all
                        A
The world s never gonna fall back
C#m
Ask where you re at
E                  B
Out with the old, let the truth be told
A      B           E
Shape up, and stand tall
```

[Verse 2]
```
        E
When I tell you why I don t act my age
    C#m                              B
It compliments the fact that you ve got nothing to say
E                              C#m
I knew that it took time and a fucked up mind
          B
Just to stay in line
E
But all the value I could demonstrate
C#m                      B
And all the places that I ve grown to hate
```

```
                    E
Well, they bring life, so I ll say it twice
C#m            B                      A        B
I just wanna know what it s like to rebel [rebel]

[Chorus]
A         C#m  B                 A     C#m
So I ll tell myself that I m not a victim
E                     B                       A
But I ll own up to the mistakes that I made
      C#m             E
I can see through it all
                           A
The world s never gonna fall back
C#m
Ask where you re at
E                 B
Out with the old, let the truth be told
A      B          E
Shape up, and stand tall

[Bridge]
A                         E
I could lie if you wanted
     A                                E
But in the night I think of all this time and all this space
          C#m                                          E
And all the tracks in the dirt that we could retrace back home

I m not alone
           C#m                 E
Don t put my story back on it s shelf
     B                              C#m    B   E
I was choked up but my tongue untied itself

[Chorus]

C#m           B                   A      C#m
So I ll just tell myself that I m not a victim
E                     B                     A
But I ll own up to the mistakes that I made
      C#m             E
I can see through it all
                         A
The world s never gonna fall back
C#m
Ask where you re at
E                 B
Out with the old, let the truth be told
A      B                E
```

Shape up, and stand tall
