## The Fix Up State Champs

I couldn t find a tab i felt sounded good for this song yet. I came up with this all by ear, i thought i would share!

[Verse 1]

F# B G#m C#

So what s it gonna be, the fix up or the falling out? F# B G#m C

It s hard to get a read on the signals that you're sending out

 $F\# \qquad B \qquad G\#m \qquad C\# \\$  And if you wanna leave, then there s not much to talk about

F# B G#m C#

I m looking for relief, but still wondering if you ll stick around

[Pre-Chorus]

C# B

For once I wanna take the blame tonight

C#

I wanna get lost and fall behind

F#

But I don t wanna let it go

G#m

No, I don t wanna let it go

R

It s funny how you found complacency

C#

You re tuning out the thought of you and me

F#

And now you gotta let it go

G#m

Now you gotta let me go

[Chorus]

F# C#

I thought the worst was you giving up

G#m B

But now we re chasing feelings just to be ok

F# C‡

You knew the northern weather was t enough

G#m

Don t bother at all

F#

It s all drifting away with the way we used to be

[Instrumental]

F# B G#m C#

```
[Verse 2]
                 F#
                                          G#m
                                                  C#
                              В
So what did you expect, a rescue or a getaway?
                                      G#m
             F#
                           В
                                                 C#
If I had to bet, I d take you getting over me
                   F#
                                                    C#
                                 В
                                            G#m
So tell it to my face, don t hide behind poetry
                   F#
                                                       C#
I ll find a better place for you and all your apathy
[Pre-Chorus]
C#
                      В
For once I wanna take the blame tonight
                      C#
I wanna get lost and fall behind
                          F#
But I don t wanna let it go
                          G#m
No, I don t wanna let it go
It's funny how you found complacency
You re tuning out the thought of you and me
                          F#
And now you gotta let it
                           go
                      G#m
Now you gotta let me go
[Chorus]
              F#
I thought the worst was you giving up
                      G#m
                                           В
But now we're chasing feelings just to be ok
             F#
You knew the northern weather was t enough
                G#m
Don t bother at all
                                                 F#
                 В
It s all drifting away with the way we used to be
[Bridge]
F#
                      C#
Where do you get off causing problems
                           G#m
Where do you get off when I m not around
                               C#
It s hard to brush it off when you're constantly calling me
                            G#m
Cause baby you get off when I m down
[Chorus]
              F#
                                    C#
```

I thought the worst was you giving up

But now we're chasing feelings just to be ok

F#

C#

You knew the northern weather was t enough

G#m

Don't bother at all

B

It's all drifting away with the way we used to

It s all drifting away with the way we used to be

F#

[Outro]

 $$B_{\mbox{\sc B}}$$  Its all drifting away with the way we used to be
