G                              D
Run, run like the wind

                          Em
Don t wait for a thing

                C                    G
There is nothing here for you

                D
But if you stay

                    Em
Then let me say

          C                          G
I ll go out of my way...for you

                    D
It s not like before

                  Em
I ll say no more

      C                              G
Everyone else has said it for me

              D                 Em              C
      G
Beautiful tree, beautiful tree it s a shame that the root of its me

G                              D
Sleep, sleep on the floor

                      Em
Knock on the door

      C                              G
To tell me if you want some more
```

```
            D                                       Em
I can t relate to what s on your plate

              C                               G
My appetite never failed before

                 D                  Em              C
     G
Beautiful tree, beautiful tree, it s a shame that the root of its me
                 D                  Em              C
     D
Beautiful tree, beautiful tree, it s a shame that the root of its me

 C                              D                              G
Tell me tomorrow, I ll wait by the window for you

G                           D
Run, run like the wind

                         Em
Don t wait for a thing

                 C                          G
There is nothing here for you

                  D
But if you stay

                 Em
Then let me say

           C                          G
I ll go out of my way...for you

                  D
It s not like before

              Em
I say no more

           C                                  G
Everyone else has said it for me

                 D                  Em              C
        G
Beautiful tree, beautiful tree it s a shame that the root of its me

I ll wait by the big house for you
I ll wait by the squeeze box
I ll wait by the dresser for you
```

This is my first try at this, so if anyone spots anything wrong, please email me and let me know.
