What If I Just Want To Go Home
Stereolove

http://stereolove-music.de/stereo-loves-you/index.html

you can play **F#maj7** instead of **F#**, sounds better!

C#
Maybe you got me on my knees love
C#
Your lies had spread like bees love
C#
Spreading the disease love
                                        F#
IÂ´ve never tasted colder blood
                                        G#
So hereÂ´s to your plastic gods

C#
Maybe you cannot remember
C#
One cold day in december
C#
All fired up like ember
                                                F#
You watch who youÂ´re talking to

C#
And maybe the sky will fall on me love
C#
The parting of the sea stopped
C#
ItÂ´s time to hold your head up
                                F#
Deciphering the codes in you
                                            G#
Not sure what youÂ´re trying to do

            F#   **F#**
So IÂ´ll just sing for you IÂ´ll always do

                C#
What if I loved you for what I once knew
                F#
What if I hurt you well what if IÂ´m hurt too
                                        G#
When the music is gone something went wrong
                                    F#
And I just wanna go home

```
                             C#
I just want to go home

C#
Maybe you really believe that
C#
YouÂ´ve power over me
C#
Just because I took the beating
F#
Are you really dumb enough

C#
And maybe IÂ´m just too blind to see that
C#
ItÂ´s hard for you to breathe
C#
Set sail to rule the seas
                                            F#
The storm has conquered all your sun
                            G#
So IÂ´m gonna bite my tongue
            F#                            F#
Instead IÂ´ll sing for you IÂ´ll always do

What if I loved you for what I once knew
What if I hurt you well what if IÂ´m hurt too
When the music is gone something went wrong
And I just wanna go home
            Fm                                      F#
What if I heard you stick to your own truth
            Bbm                                   G#
What if I learned you are as cold as a court room
                         F#                                    F#
When the music is gone something went wrong
                      F#                                C#
something went wrong and I just wanna go home

C# ......... F#
ohohohohoh...

            G#                            G#
So IÂ´ll just sing for you IÂ´ll always do

What if I loved you for what I once knew
What if I hurt you well what if IÂ´m hurt too
When the music is gone something went wrong
And I just wanna go home

        Fm                                F#
What if I heard you stick to your own truth
```

```
              Bbm                                          G#
What if I learned you are as cold as a court room
                    F#                              F#
When the music is gone something went wrong
                    F#                              F#
Something went wrong where did we go wrong
                    C#
I want to come home
```
