

Love Take Me Over
Steven Curtis Chapman

Many thanks to Marty Keith for figuring this out and posting a YouTube tutorial, which I've blatantly plagiarized with his permission for this tab. There's a lot of muting and staccato, especially in the intro and verses. Just listen to the recording to catch the groove, or check out Marty's video for strumming instruction.

I claim no rights to this - I just wrote it down.

Tuning is DADGAD tuned down 1/2 step (Db,Ab,etc.)
