

Say What
Stevie Ray Vaughan

Album: ???

I tabbed this all by ear and it took me about three days. It s not perfect but i d say 90-95% correct. Also, I wanted to point out that I don t think its from the soul to soul because i looked for it on yahoo to hear a sample, and SRV uses a wah pedal. On this he doesn t. It still sounds cool though with a wah but i think he uses only a little I have no idea what version this is or on what album its from but its the best that i ve out of all of them. I found it on Ares or something like that. It s not the one from SNL, Daytona Beach, or Soul to Soul. If anyone knows where it s from please let me know. to tune down half a step. Also if you can t find this version, let me and i ll attach it to an e-mail and mail it to you. This is SRV at his best.
