

**Seven Caged Tigers**  
**Stone Temple Pilots**

There are some additional notes after this layout on the way certain things are fingered. This edition is a bit of a hybrid of the album version and the acoustic

version played on the Howard Stern show...Listen to the song, and match up what I have here, and it s a really easy piece to add to your collection.

#### NOTES:

On the E major chords, hammer on G string 2nd fret as in song.

The first C major in verses is played (-32030)

Second C major in verses is played (-32033), and walks middle finger down to B note.

The B major in the verses has a little walkup to it as well; the little finger slides

up one fret and then the F# on the bottom string is accented.

You ve really just got to listen to the song to get the feel of where the hammers, slides, etc are.

Also, in the acoustic version I ve heard, a barred D minor chord can be used in place

of the Bb major. It s a nice variation and can even be switched back and forth  
as you  
play the chorus.

Hope this helps!
