

Chica Me Tipo
Sublime

I noticed there s no chords around for this awesome little song so I decided to tab my
This is my first tab, so bear with me. I m not sure if the key is correct, but the
works, just give it a try. I posted the lyrics I found on some website a while
back as
as their english translations in round brackttets.

Note 1: when a line appears to end with the Dm chord in the verse, just keep
playing it
you hit the A# in the next line (in other words, don t break your strumming
pattern just
the next chord is on a different line)

Note 2: the chords in the [square brackets] aren t played in the song, but you
can play
if you want.

Enjoy!
