

Flicker Intro
Submersed

This may not be totally correct (especially the upstrum chords and tuning might be wrong)
but I m not going to kill myself over it since there s practically no tabs out for this band yet. The second section is the section where i think that the tuning is E A D F B E.
I think this way because of the pick chord at the end of the second line. If you listen closely you can hear each note ringing individually.
