

Fourth Of July  
Sufjan Stevens

[Intro]   **Am**   **G**   **F**  
              **Am**   **G**   **F**  
              **Am**   **G**   **F**  
              **Am**   **G**   **F**

**F**              **G**              **C**              **G**  
The evil it spread like a fever ahead  
          **F**                              **G**                              **F**  
It was night when you died, my firefly  
**F**                              **G**              **C**                              **G**  
What could I have said to raise you from the dead?  
          **F**              **G**                              **F**  
Oh could I be the sky on the Fourth of July?

**G**              **C**  
Well you do enough talk  
**G**              **C**              **G**                              **F**  
My little hawk, why do you cry?  
          **G**                              **C**                              **G**                              **C**  
Tell me what did you learn from the Tillamook burn?  
          **G**                              **F**  
Or the Fourth of July?  
                              **F**              **G**              **C**              **G**              **F**  
We re all gonna die

( **F**   **G**   **C**   **G**   **F** )

**F**                              **G**                              **C**                              **G**  
Sitting at the bed with the halo at your head  
          **F**              **G**                              **F**  
Was it all a disguise, like Junior High  
          **F**                              **G**              **C**                              **G**  
Where everything was fiction, future, and prediction  
**F**                              **G**                              **F**  
Now, where am I? My fading supply

**G**                              **C**              **G**                              **C**  
Did you get enough love, my little dove  
**G**              **F**  
Why do you cry?  
          **G**              **C**                              **G**                              **C**  
And I m sorry I left, but it was for the best  
          **G**                              **F**  
Though it never felt right  
                              **F**              **G**   **C**   **G**   **F**              **G**  
My little Versailles

( F G C G F G F )

F G C G  
The hospital asked should the body be cast  
F G F  
Before I say goodbye, my star in the sky  
F G C G  
Such a funny thought to wrap you up in cloth  
F G F  
Do you find it all right, my dragonfly?

G C G C  
Shall we look at the moon, my little loon  
F  
Why do you cry?  
G C G C  
Make the most of your life, while it is rife  
G F  
While it is light

G C  
Well you do enough talk  
G C G F  
My little hawk, why do you cry?  
G C G C  
Tell me what did you learn from the Tillamook burn?  
G F  
Or the Fourth of July?  
F G C G F G  
We re all gonna die  
F  
We re all gonna die

Am G F  
We re all gonna die
