Verse 1 Chords:

```
C           F           G5           F
I came out from under her warm sheets
Dm         C           F           G
    Into the brisk late    October
C         F         G5         F
If only for one last hope
Dm         C           F           G
    I wanted my time with you    to be over
```

Verse 2: use verse 1 chords
Iâ€™m staring up into the sky
While all the raining is pouring down
Iâ€™m reaching out for your help
But evil beings hold me backwards

Chorus 1:

Evaporated sea salt water
A mist above the skyline
I haunt the streets of San Francisco
Watch over loved ones and old friends
I see them through their living room windows
Shaken by fear and worries
I want them to know how I love them so

Chorus:

Foghorns would sound in waking
Is it my voice you hear?
Footsteps are moving across the floor
And you know Iâ€™m here
The afternoon carries up from the hills and you are well and near
To fall into the light I follow

Interlude 3: **Em-C-Dm-C-Am**

Final Bridge:

C **Am**
I feel oh so near, when morning doves appear
C **F**
And ghosts of April ring, echo the refrain
C **F** **G**
Soon finding a place, in these lost verses
C **G**
They fill the foggy day, they hide the hills away
F **C**
That steal our time, they are the picturesque night
F
The casting city lights
C **F** **G**, then **C-F-G5-F** x2
On the bay flowing into the ocean glowing

Outro Chords: **Em-Am-F-C** (repeat until fade out)
