

**Faces In Disguise**  
**Sunny Day Real Estate**

Standard Tuning

Chord progression: **F Dm A**

You can also play Dsus2 instead of Dminor. Just take your top finger off the first fret and just play the second and third frets. It looks like this:

```
|-----|  
|-----3-----|  
|-----2-----|  
|-----|  
|-----|  
|-----|
```

**F Dm (or Dsus2 ^ ) A**

The tempo stays the same throughout the whole song. Chords never change. Pretty easy, but a great song by a great band.

**F**                    **Dm**                    **A**  
these fears come rushing in when i enter here  
another layer on my back  
a blazing fire where our glances meet  
the largest feeling towering over me

**F**    **Dm**            **A**  
faces in disguise  
          **F**        **Dm A**  
not a trace of desire...

i long to take you to a secret place  
where we could lay aside our past  
we d throw the world away with all it s pain  
to shine like stars through storm and clouds and rain

faces in disguise  
not a trace of desire...

(It sounds like there is an chord change here, but only for the bass, not the guitar, so same chords still apply)

go face the day, go and see new things  
go face the day, but you ll remember me...

i see a tear inside when you re turned away

another wound that i d take back  
if i could fill your heart just once  
and then i d take you now  
where we could live again

faces in disguise  
not a trace of desire...

faces in disguise  
not a trace of desire...

go face the day, go and see new things  
go face the day, but you ll remember me.
