

Sad Girl
Supergrass

Date: Thursday 7 September 2006

Beautiful song... And yet no one tabbed it!
I m not a great tabber , but I tried my very best on this :)(-> 45 minutes!)

Please also note: I ve put the whole chorus under the C#m chord. Although it sounds right playing along with the music, it gives the wrong effect when playing alone. I guess it a bit better on piano than on guitar...

Standard tuning (Eadgbe)
