Solitude stands by the window
She turns her head as I walk in the room
I can see by her eyes she s been waiting
Standing in the slant of the late afternoon
And she turns to me with her hand extended

Her palm is split with a flower with a flame
Bbm7 B7+ C# G#m G#9

Solitude stands in the doorway
And I m struck once again by her black silhouette
By her long cool stare and her silence
I suddenly remember each time we ve met
And she turns to me with her hand extended

They re sitting all together in the dark in the warm
I wanted to be in there among them
I see how their eyes are gathered into one
And then she turns to me with her hand extended
