Late Night
Syd Barrett

```
C                    Bb
When I woke up today
                        G#
And you weren t there to play
                F
Then I wanted to be with you
C                        Bb
When you showed me your eyes
                          G#
Whispered love the skies
                    F
Then I wanted to stay with you

C#   G#        Bbm
Inside me I feel

C#   G#        Bbm
Alone and unreal
          Eb
And the way you kiss
                  G#                      Eb
Will always be a very special thing to me
C                        Bb
When I lay still at night
                          G#
Seeing stars high and light
                        F
Then I wanted to be with you

C                          Bb
When the rooftops shone dark
                      G#
All alone saw a spark
                          F
Spark of love just to stay with you

C#            G#
Inside me I feel...

C                        Bb
If I mention your name
                          G#
Turn around on a chain
                        F
Then the sky opens up for you

C                          Bb
```

When we grew very tall
                         G#
When I saw you so small
                    F
Then I wanted to stay with you

C#   **G#**
Inside me I feel...
