Late Night
Syd Barrett

```
C#                      B
When I woke up today
                          A
And you weren t there to play
                F#
Then I wanted to be with you
C#                            B
When you showed me your eyes
                      A
Whispered love the skies
                    F#
Then I wanted to stay with you

D   A         Bm
Inside me I feel

D   A         Bm
Alone and unreal
          E
And the way you kiss
                  A                        E
Will always be a very special thing to me
C#                      B
When I lay still at night
                        A
Seeing stars high and light
                  F#
Then I wanted to be with you

C#                          B
When the rooftops shone dark
                    A
All alone saw a spark
                      F#
Spark of love just to stay with you

D           A
Inside me I feel...

C#                        B
If I mention your name
                        A
Turn around on a chain
                      F#
Then the sky opens up for you

C#                          B
```

```
When we grew very tall
                         A
When I saw you so small
                     F#
Then I wanted to stay with you

D           A
Inside me I feel...
```
