

Back In Your Head
Tegan and Sara

Okay, this isn't completely correct but it's the closest I've come to figuring out the chords for the song. Just try it, trust me it's extremely close the key is just a little different. What I mean is the key in the verse is a tad higher, and the chorus is a bit lower than the original, but that isn't much of a problem when playing the song. This will hold you over until someone (maybe me :)) is able to figure out the true chords Tegan and Sara play.

Capo 2
