

## I Run The Carousel

### Teitur

#### Notes:

- + On the album he seems to play the C and G/B chords as indicated on the left. I included alternate fingerings in parenthesis on the right as an easier version  
(plus the transitions are smoother when you stay in one position on the neck).
- + The general pattern for picking in the verse is low-mid-high-mid. He includes variations throughout where he just plays low-high-low-high, such as F and Fsus2.
- + I m not entirely certain that the low E string rings throughout all the chords in the chorus. But without it, the chorus sounds kind of weak. The ringing low E adds power, so I included it.
- + The dashes for the chords in the chorus are just to remind you to strum the chord once and then directly strum the next chord following the dash. Listen to the song and you ll get the pattern.
- + After the second and third chorus there is a weird transition section. It s hard to tell what exactly is going on here, but the overall harmony sounds like the indicated G#maj7 chord so just play around with that.
