

California

The Airborne Toxic Event

C
Some day they re gonna write about us
G
Living here in the shadow of this gathering dust
Am F
As the waves build up and drown the light
C G
While we re hanging from buildings on a Saturday night
C
And the words she said, I could barely hear
G
Over the blare of the speakers and the smell of beer
Am F
When she got up to speak she lifted her dress
C G
I remember her face, but I forget the rest

F C
Here in California I was
G
Just a name and a number
Am
A face on a tumbler
F C
Here in California we re all
G
Stuck in the same scene
Am
All nightmares and daydreams
C F G C
In California

C
She said I got money, but I got no friends
G
As we drove through the valley in her daddy s Benz
Am F
She said these pills wear off, but the pain don t end
C G
I never thought it would matter so much to pretend

C
And the thing about her that haunts me still
G
As her hands fell down to the steering wheel
Am F
And a shock of light fell across her face

C **G**
She said there s only two ways out of this place

F **C**
Here in California I was

G
Just a name and a number

Am
A face on a tumbler

F **C**
Here in California we re all

G
Stuck in the same scene

Am
All nightmares and daydreams

C F G C
In California

F **C**
Oh, I hope it s clear

F **C**
There s no room for us anymore in the atmosphere

F **G**
But darling I always liked

F **G**
The desperation in your eyes

F **C** **F** **G** **C**
The way you dance in the glow of the Hollywood freeway lights

C
Someday they re gonna forget about us

G
And we ll wonder if we were ever good enough

Am **F**
It hit me last night, in this song I heard

C **G**
I remember the feeling but forget all the words

F **C**
Here in California I was

G
Just a name and a number

Am
A face on a tumbler

F **C**
Here in California we re all

G
Stuck in the same scene

Am
All nightmares and daydreams

C F G C
In California
