Far away where you stock them in cages that tether

Pre-Chorus:
```
F#          C#
And all the bridges you ve burned

F#          C#
Leave you trapped out at all sides

F#          C#        F#          G#/C
Now the tables do turn and its all gone whats left for you
```

Chorus:

```
F#          C#            F#          G#
And when the sky is falling, dont look outside the window

F#          C#            F#          G#
Step back and here I m calling, give up, dont take the fast road

F#          C#               F#           C#
Its just your doubt that binds you, just drop those thoughts behind you

Sit down, youre sinking, there s no one to watch you
Skip town youre thinking, there s no one to stop you

Its better than your worst, your worst day
