

**One More Time**  
**The Clash**

Tom : Em

**F#m**                    **E**                    **F#m**                    **E/F#**  
Must I get a witness? for all this misery  
**F#m**                                    **E**                    **F#m**                    **E/F#**  
There s no need to, brothers everybody can see  
                  **F#m**                                    **E**  
That its one more time in the ghetto you know  
**F#m**                                    **E/F#**  
One more time if you please now  
**F#m**                                    **E**  
One more time to the dying man  
                  **F#m**                                    **E/F#**  
They say one more time if you please

The old lady kicks karate  
For just a little walk down the street  
The little baby he knows kung fu  
He tries it on those he meets  
Cos its a one more time!

You don t need no silicone to calculate poverty  
Watch when Watts town burns again  
The bus goes to Montgomery

Cos it s a one more time in the ghetto  
One more time if you please  
One more time for the dying man  
One more time to be free
