

Waitin For A Superman
The Flaming Lips

Flaiming Lips
Waitin For A Superman

An Original Tab by NeonGod

Notes: You can use this for both versions though the original doesn t play the chords

on I m not sure what is being played in the remix where it says F? . It makes sense that would be an F, but the bass makes it hard to distinguish. Might be a few chords in there. Also, there are some transition progressions missing, like where the song goes into the This is just to give you the basic idea of the song.

All chords listed should be played as barre chords.
