[Verse/Chorus]

```
      D              A
I met a ghost deep in the valley
      D  D*          G
And then a river came in view
      D              A
And the water, I drank it down
      A7      Bm  A
And inside me soon
      G              A              D
The valley came bursting into bloom
      G              A              D
The valley came bursting into bloom
```
