

**General Store**  
**The Gruff**

I m unsure if the lyrics are exactly correct, but it s pretty close.

Capo 2nd fret.

Well I come from the city on the Island see  
where the girls are pretty and the boys are free  
what would they do, would they do without me  
now I have gone to the mountain trees

You gotta follow the steep and the winding road  
at a thousand feet a-lighter comes your load  
a thousand more feeling light as air  
happiness like this is rare

[CHORUS]

And I m going down to the general store  
and the cowboy bar right next door  
gonna dance to the local band  
and raise a glass to this mountain land  
raise a glass to this mountain land

when you come from the sea everything is strange  
the prairie lands and the mountain range  
you let go of your fear and your lonely rage  
you take a deep breath and you turn the page

well you can do it together, you can do it apart  
you can use your head or you can use your heart  
but be sure that you try with all your might  
to make your heavy load seem light

[CHORUS]

Well I come from the city on the Island see  
where the girls are pretty and the boys are free  
what would they do, would they do without me  
now I have gone to the mountain trees

[ CHORUS ]
