Firefear
The Head and the Heart

```
F                              Am
Its a long way to the other room while Im
C                             Gm
Grading papers and tying shoes
F                              Am
Oh, you never had much to loose
 C                              Gm
So Im blaming you for these hopeless blues

F                                    Am
Whats to say when the kids are gone
C                                      Gm
Ive made the beds and been left alone
 F                             Am
You look as cold as a stone
C                                           Gm
Theres no way to right whats been done wrong

Gm         C          F  C  Dm
And you left me fool
Gm        C   F  C  Dm
So what to do
Gm       C   F  C  Dm
What to do

F                              Am
So hold me down if Im running off
C                                   Gm
They say it gets better baby soon enough
F                                   Am
So I shut my mouth and steel my heart
C                                          Gm
But I still feel like a girl thinking when we started

Gm                        C
And I wanna feel the fire again
F                  C           Dm
With you or anybody else
Gm                        C
And I wanna feel the fear again
F                  C           Dm
With you or anybody else
Gm        C   F  C  Dm
So what to do
Gm       C   F  C  Dm
What to do
Gm        C   F  C  Dm
```

What to do
