

Color Red

The Henningsens

This is the studio version. They play it a little different live, you can find the live version here: <http://www.thehenningsensfans.com/lyrics-tabs/tabs/color-red/>

You can play this song several ways. I think the easiest one is with a half step down

tuned guitar. If you want to play it standart tuning click transpose -1 and play

F#, E, B, A#m, D#m instead of **G, F, C, Bm** and **Em**).

If you want a easier version with a capo, click transpose -5 and play D, C, G, F#m

and Bm, and with a capo on the 4th fret :)
