

**Schizophrenia**  
**The Jakes**

**F#**  
And now the shades are drawn  
**F#** **A** **F#**  
This dark infesting shadows cross the hall and now they're gone  
**F#**  
I see this old arcade  
**F#** **A** **F#**  
And rain comes down the gutters to the wood this liquid dawn  
**F#**  
So my heart races now  
**F#** **A** **F#**  
These palpitations bust the seams off my laced sequin dress  
**F#**  
I see you standing there  
**F#** **A** **F#**  
With rosy fingers, damn this life a godless existence

**E** **A** **F#** **E**  
This schizophrenia is taking over me  
**A** **B**  
And we don't need this now do we Oh

**F#**  
It never was like this  
**F#** **A** **F#**  
But still I could not be trusted with your love no not once  
**F#**  
We danced the meringue  
**F#** **A** **F#**  
Those golden footsteps signs of our fate in redundancy  
**F#**  
But now the past is gone  
**F#** **A** **F#**  
And now I'm messed up beyond any thought or small belief  
**F#**  
This fate is choking me  
**F#** **A** **F#**  
Like icy water from the depths of that barrier reef

**E** **A** **F#** **E**  
This schizophrenia is taking over me  
**A** **B**  
And we don't need this now do we

**E**            **A**                    **F#**            **B**  
 Behind the wheel, they stalk over the drill sirens  
**E**            **A**                    **F#**            **B**  
 Open your mouth behind shades ofâ€¦  
**E**            **A**                    **F#**            **B**  
 Waking in fire and dreaming inâ€¦  
**E**            **A**                    **F#**                            **B**  
 Holding the night behind straight corn and papyrus  
**E**            **A**                    **F#**                            **B**  
 Holding by lusciousâ€¦ Stares that you gave us  
**E**            **A**                    **F#**                            **B**  
 Waiting for strength behind locks in the fire  
**E**            **A**                    **F#**                            **B**  
 Wait for the love that you said would inspire  
**E**            **A**                    **F#**                            **B**  
 Wait for the times that you Said you would cherish  
**E**            **A**                    **F#**                            **E**  
 Wait for the love that you Said that would make it!

**E**            **A**    **F#**                            **E**  
 This schizophrenia is taking over me  
**A**    **B**  
 And we donâ€™t need this now do we
