D-----|  
A-----|  
E-2/4-4-4--15-14-|

Chorus x6  
Pre/Post Chorus x1  
Intro part 1 x4

End

Lyrics:

You re pretty, oh so pretty  
Why waste your time just sitting  
here and listening to that dead-eyed bitch?  
Do nothing: eat your chocolate  
Drink your wine, she won t let you  
Make your way across her empire line

What s eating you is a mystery  
But go home with her one more time  
And you know you ll be history

Watch movies with the lights on  
Sit still and leave her tights on  
Didn t you see this one sometime last week?  
Go on, say something clever  
Just accept that she will never  
Take you higher than her attic room

What s eating you is a mystery  
But go home with her one more time  
And you know you ll be history

She ll never take you to giddy stratospheres, i ll confirm your fears

She ll never take you to giddy stratospheres, i ll confirm your fears  
(Is she a femme fatale?) That s what she wants you to think  
(She ll never lead him astray) But it s the best she can do  
(But is she going away?) No, she ll always be here waiting for you  
Back here on earth

Your mother, call your mother  
Even she s surprised that this is  
How you want to spend your nights indoors  
You never call to often  
What s up? Have you forgotten  
What it s like to have her on all fours

What s eating you is a mystery  
But go home with her one more time  
And you know you ll be history

She ll never take you to giddy stratospheres, i ll confirm your fears  
She ll never take you to giddy stratospheres, i ll confirm your fears  
(Is she a femme fatale?) That s what she wants you to think  
(She ll never lead him astray) But it s the best she can do  
(But is she going away?) No, she ll always be here waiting for you  
Back here on earth

There s a train at the station  
It s leaving this morning  
It ll take you away from  
This girl that s so boring  
Don t turn around, just walk away  
Don t turn around, just walk away  
Don t turn around, just walk away

She ll never take you to giddy stratospheres, i ll confirm your fears  
She ll never take you to giddy stratospheres, i ll confirm your fears  
(Is she a femme fatale?) That s what she wants you to think  
(She ll never lead him astray) But it s the best she can do  
(But is she going away?) No, she ll always be here waiting for you  
Back here on earth
