

**This Living Will Get You Dead
The Loved Ones**

Hey guys! This is a really killer song based off of a simple 12 bar blues progression.

Ive edited and reposted the other tab to make the appropriate corrections, unfortunately have no idea who the original author of the tab is, so credit should really go to him most of it...he just had one chord half wrong! (key of E major has F#s)

Just so its clear, F#5 is a power chord on F# or the second fret of the low E string for tab guys!

You CAN use F#m instead but i find the power chord sounds a little more authentic

here it is!
