

Submarines

The Lumineers

The trick to this song is staying on top of the triplets when you re strumming. Some of the chords are transitions so listen for the changes. On the **C-Cadd9** change, you just drop your pinky down right before the second **G**.

Be careful towards the end of the song the chord progressions changes to include an **Em**

I have chorded the whole song and it should be right.

Enjoy.
