[Verse 1]

```

C              F              Am
Never thought I d write about how I ve fallen
      Dm          G              C              F
So insincere I might as well stab myself in the face
C              F              G
Drag me kicking and screaming from this place
      C              F              Am
These friends I ve got you d never think I would feel so alone
Dm          G      C              F
Cry myself to wake, fall asleep for days
C              F              G
Take a blood oath with the kitchen sink
```

[Chorus]

```

F              C      F              C
Worthless are a memory, real only skin deep
F              C      F
Product of insomnia, to fall asleep
```

[Verse 2]

```

C              F              Am
I appreciate the genius in a metaphor
      Dm          G              C              F
In 5 years where will it get you, a self absorbing fool
      C              F              G
The catastrophic wheel side revery
      C              F              Am
Am I so vane, to think you d want to hear me?
      Dm          G
Sing of boundaries and borders
      C              F
And delinquent memories
      C              F              G
The catastrophic wheel side revery.
```

[Chorus]

F **C** **F** **C**
