

Murder Me Rachael
The National

This is at least close. It's difficult to pick exact chords out of the mix. I can't always hear the chord changes either; I have to just be confident that they're there. Sometimes it sounds like they skip the G, but maybe C is just emphasized more. Maybe G should be G/D? Anyway, let me know if you have any suggestions.

This is the bass tabbed for guitar, I think--it's hard to hear. There's something like this going on in there, regardless.
