Sleep All Summer

The National - Sleep All Summer ( Crooked Fingers Cover )
It s my first tab, but I think it should be right.
Α
Weary sun, sleep tonight, go crashing into the ocean
Cut the line that ties the tide and moon, ancient and blue
                                      D
We take our empty hearts and fill them up with broken things
To hang on humming wire like cheap lamps down a dead end street
(Close your weary eyes until the wintertime)
                        Е
                               Bm
And every time we turn away it hits me like a tidal wave
I would change for you but, babe, that doesn t mean I m gonna be a better man
Give the ocean what I took from you so one day you could find it in the sand
And hold it in your hands again
Cold ways kill cool lovers
Strange ways we used each othe
Why won t you fall back in love with me?
There ain t no way we re gonna find another
The way we sleep all summer
                                        A E
So why won t you fall back in love with me?
Combing over Broken Cross I held on you
Haunted by the ghost of something new
Curtains fall, fashions fade, an endless summer over
Another tide to launch an autumn moon over the dunes
```

There must be a better way to pull a whole apart To keep a world from caving in
