Brother
The Okee Dokee Brothers

[Verse 1]
```
A                    D
Brother, Brother, we ve known one another
A           E
Since I can recall
        A                      D
We ve had smooth sailin  days, and storms with waves
        A    E      A
Times we fly, times we fall
D                        A
 Cause under the surface the water runs deep
E                   A
And the current is strong
       D              A
It can bring us down, it can make us drown
          E              A
Or we can just let it roll us along
```

[Chorus]
```
       D          A        E                A
Let it roll, Let it roll c mon brother let s let it roll
       D          A        E                A
Let it roll, Let it roll c mon brother let s let it roll
```

[Verse 2]
```
A                 D
Brother, Brother, we know one another
A                    E
Like a captain knows his boat
        A                      D
We ve seen blue skies together and cloudy weather
        A    E      A
Times we sink, times we float
D                        A
 Cause under the surface the water runs deep
E                   A
And the current is strong
       D              A
We can run out of steam by paddling up stream
          E              A
Or we can just let it roll us along
```
