This is my way, what is my way, in my mind

But when I think about it
All the noise and it all comes around me
And the people that surround me
Laugh like jokers they all mess around me
Run away and all in the gutter

Real like butter, science to discover
If I mean it, see that you do
All the things that I ever want to do

I m tired of finding a rule or frame
Lost the job do you step in line
Care to find we have no shame
Put your breath on

This is my way, what is my way, in my mind
This is my way, what is my way, in my, my

Trying to find a rule or frame
Lost the job do you step in line
Care to find we have no shame
Put your breath on

This is my way, what is my way, in my mind
This is my way, what is my way, in my, my
