Black Limousine
The Rolling Stones

(intro) **C# G# Eb C# G# Eb**

(verso)

                    C#
      We used to ride, baby
                            G#
      Ride around in limousines
                   C#
      We looked so fine, baby
                            G#
      You in white and me in green
                   C#
      Drinking and dancing
                            G#
      All inside a crazy dream
               Eb
      Well now look at your face now baby
    C#   **G#**   **Eb**
      Look at you and look at me

(verso)
      I get so scared
      Just to see you on the street
      They re living dead
      You re all the same, you never speak
      You re wrecked out now
      Washed up high up on the beach
      Well now look at your face now baby
      Look at you and look at me

(instrumental)   **C# G# C# G# Eb C# G# Eb C# G# C# G# Eb C#**
