Unravel Unwind
The Spring Standards

```
E                                         E7   2x2100
You look just like me way back then
E
We took no prisoners
        C#/E          B/E
We had no need of them
E        B                  A
You shook your angry fist alongside mine
   F#m            A
I didn t know it at the time
     B        E
The world unravels in rewind

E
In spite of all that we have said
      E7                  2x2100
And everything we ve done
E
The space between our words
   C#/E            B/E
Is all that we ve become
   E                    B              A
I believed you when you told me you were fine
             F#m              A
I should have known it at the time
A        B           E
The world unravels in rewind

[CHORUS]
E
Say it
C#m               B              E
Say the words I see behind your eyes
           C#m          B
If it s not hard to say
             A   F#m
Then it s a lie
          C#m              B
I know you think we can not heal
           E
But we can try

E                                 E7          2x2100
I ve been known to hide from the people that I love
     E                            C#/E   B/E
I m afraid, I guess, that I m easy to tire of
      E                  B              A
```

But I swear I ll risk it all to make you mine
      F#m   **A**
If I can get you back in time
        B
We won t unravel
          E
We ll unwind
