Special place and time
I put it in the bottle like back there in my mind
Im up above the clouds that like to
Crashing back to earth
Cause I know this cant work
It s when it hurts

I close my eyes
And you are here
With me tonight, tonight

In another world lord I know I know that
You would be my girl
And nothing would tear us apart
Another universe the stars would light the way for just the two of us
And nothing would tear us apart

In another world
Just the two of us

And nothing would tear us apart

I just close my eyes
And youre here with me tonight
And nothing would tear us apart

I just close me eyes
Cant get you off my mind
And nothing will tear us apart
In another world the stars would light the way for just the two of us
And nothing would tear us apart

People like to talk
But I cant understand a word they throw to us to the wolfs
