Artist: The Verve  
Song: Blue  
Album: A Storm in Heaven

Tabbed by: Revlin

Getting close to 20 years and I can't find any matter of tab for this song?  
That just won't do, so I spat this one out quick. Won't claim it's perfect but  
it's a start.

Guitar lick repeated throughout

```
e|-----|
B|-----|
G|-----|
D|-----|
A|-----7h9-----7h9-----|
E|--7h9----7h9-----|
```

B (with rhythmic palm mutes)

There you were, on the floor,  
Cut up and all alone, Iâ€™ll help you,  
Conceived in a chrome dream,  
I was the crease in the shirt that this world wears,

Till I met blue, I was in obscurity,  
He said, â€œListen up, who do you want to be?â€•  
We could steal a car and listen to the stars,  
I can see youâ€™ve choked on them too,  
Had enough of late night films,  
Just settle for an hour or two,

Oh blue, show me something new,  
Oh blue, show me something new,

<b>Bb</b>	<b>Gm</b>	<b>F</b>	<b>C</b>
Blue, Iâ€™ve got a question every time I hold you,			

**Bb**                      **Gm**                      **F**                      **C**  
Yeah blue, Iâ€™ve got a question every time I swallow you,  
Itâ€™s true.

B (with rythmic palm mutes)

Spike danced for ten days long,  
We were just heading for the sun,  
You shot him down,  
There s blood on my face,  
His heart s in the right place,

What they gonna do to you?  
What they gonna do?

**Bb**                      **Gm**                      **F**                      **C**  
Blue, don t forget the word I warned you,

**Bb**                      **Gm**                      **F**                      **C**  
Oh blue, don t let them push you, don t let them destroy you.

**Bb**                      **Gm**                      **F**                      **C**  
Meanwhile, I m searching with my brain blown eyes,

**Bb**                      **Gm**                      **F**                      **C**  
See the world through my dirty lonely mixed up mind.
